

Quick User Guide

Features

- Driver: 2.75" x 1.75 Dan Clark Audio designed single-ended planar magnetic
- Precision machined aluminum baffle, pivots and gimbals
- Titanium "Memory Metal" headband
- Leather comfort strap
- Italian lamb-leather ear pads
- Matched drivers: +/- 0.5 dB between 100 - 9k Hz
- TrueFlow Technology

Safety Instructions

- Read instruction manual carefully and completely before using this headphone.
- Keep the headphone, accessories, and packaging parts out of reach of pets and children. This product contains small parts which may present a choking hazard.
- Use only attachments, accessories, and spare parts supplied or recommended by Dan Clark Audio.
- Protect your hearing from high volume levels. Permanent hearing damage can occur when headphones are used at high volume levels for extended periods of time.
- Do not expose headphone or accessories to extreme temperatures, such as a parked car in summer.
- Always keep headphone dry.

Headphone Fit Adjustments

Adjust slider up or down on both left and right sides for proper fit.

You can adjust the fit of your headphone by re-positioning the headband slider. To adjust the headband move the sliders up or down until you achieve your desired fit. It may be necessary to remove thick glasses or hats to achieve a proper seal between your head and ear pad. An improper fit can cause a bad seal resulting in poor bass response.

Tip: Try inserting the arms of your glasses into the top of the ear pad instead of resting them directly on your ears.

Attaching a Cable

All Dan Clark Audio planar-magnetic products use Hirose-style connectors. To attach your cable hold the male connector by the boot and rotate it into the female receptacle on the headphone until you feel it click into place. To release the cable pull down on the top of the connector's metal jacket.

TrueFlow Technology

What is TrueFlow? All planar magnetic drivers utilize magnets in their motors. These magnets create hard right angles that audio waves must pass through, to their detriment. When sound waves are forced to travel around hard edges this creates diffraction effects (recall your high-school physics where waves hit objects) and also generates reflections that together add entropy (noise and data loss) to the audio wave, reducing detail retrieval and increasing distortion. Loss of information in the audio wave denies the listener the most authentic and organic music experience. We invented TrueFlow technology to directly address this issue.

Derived from our work on electrostatic stator design, TrueFlow technology fills in the area between magnets with a perforated material, eliminating hard right angles so the driver moves air through a flat, perforated surface instead of an array of magnets. The result is a nearly perfect acoustic structure that yields remarkable increases in resolution and dynamics, and extended frequency response. Visit <https://www.danclarkaudio.com/technology.html> for more details.

Product Care

- The lamb leather ear pads may be cleaned gently with a moistened cloth. Do not use cleaners or protectants, this may damage the pad.
- Clean any other surfaces with a clean, dry, and lint-free microfiber cloth.
- For the first 50-100 hours of use the headphone will 'burn-in', during this time the sounds will stabilize.

Replacing Ear Pads

The ear pads are designed to be user replaceable, however removing the pad will damage or destroy the old pad. Do not remove ear pads until you are ready to replace them.

Before replacing an earpad, go to:

DanClarkAudio.com/support and watch the instructional video.

Carry Case

Your Dan Clark Audio headphones comes with a custom EVA case for protection. There is a pouch inside the case to store your cable and a small amp, DAC, or DAP.

Warranty

Dan Clark Audio offers a 2-year warranty for headphones. The warranty commences on the date of purchase and covers the headphone cable and accessories.

Warranty is transferable provided there is documentation of original purchase that confirms purchaser bought the headphones in their country of residence. Warranty is void and is non-transferable for "Gray Market" headphones (e.g. international customers purchasing from US resellers and shipping to a friend or freight-forward for export to any country with an authorized reseller).

Warranty does not cover damage by the owner (dismantling the unit, dropping, damage by failure of electronics, etc.) or naturally occurring compression or other wear to ear pads. Acts of God and all the rest of the usual caveats apply which reinforce a warranty issue is something Dan Clark Audio did wrong, or that was intrinsically wrong with the product we received from our suppliers. We will repair or replace defective goods at our discretion

Please see <http://DanClarkAudio.com> for details on return merchandise authorizations for warranty issues and returns.
